RE: Transmittal of Approved Phase II Remedial Investigation/
Feasibility Study Work Plan for the Medley Farm Superfund Site

Mr. Stewart:

Enclosed for your file is a signed copy of the above referenced document. Please note that the Attachments to this Work Plan address the interaction between the regulatory entities and the Potentially Responsible Parties (PRPs).

It is my understanding that all Phase II field work has been completed. The draft Remedial Investigation is to be submitted to EPA by November 30 with the draft Feasibility Study due by December 31. The Agency is planning to allow three weeks for the review of these documents. It is important for the State to meet this time frame so that a consolidated set of comments can be sent to the PRPs. A draft Record of Decision should be available for review in February.

If you have any questions, please contact me at (404)347-7791.

Sincerely yours,

Jon K. Bornholm
Remedial Project Manager
